

AWS Well Architected Framework Review Report

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Establish key performance indicators (KPIs) to measure workload health and performance
Severity	High
Reference	https://aws.amazon.com/
Validation	KPIs for workload health and performance
Status	0 CloudWatch dashboard(s)

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Use monitoring solutions to understand the areas where performance is most critical
Severity	High
Reference	https://aws.amazon.com/
Validation	Monitoring solutions for performance-critical areas
Status	0 CloudWatch alarm(s)

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Define a process to improve workload performance
Severity	Medium
Reference	https://aws.amazon.com/

Validation	Process to improve workload performance
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Load test your workloads
Severity	Low
Reference	https://aws.amazon.com/
Validation	Workload load testing
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Use automation to proactively remediate performance-related issues
Severity	Low
Reference	https://aws.amazon.com/
Validation	Automation for performance remediation
Status	2 EventBridge rule(s) for automated remediation

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Keep your workload and services up-to-date
Severity	Low

Reference	https://aws.amazon.com/
Validation	Workload and services up-to-date (patch compliance)
Status	0 instance(s) with SSM (patch compliance tracking)

WAFPillar	PerformanceEfficiency
Question	What process do you use to support more performance efficiency for your workload?
BestPractice	Review metrics at regular intervals
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Regular metrics review
Status	0 CloudWatch dashboard(s) for metrics review

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?
BestPractice	Understand how networking impacts performance
Severity	High
Reference	https://aws.amazon.com/
Validation	Network performance impact analysis
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?
BestPractice	Evaluate available networking features

Severity	High
Reference	https://aws.amazon.com/
Validation	VPC endpoints for network optimization
Status	No VPC endpoints found

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?
BestPractice	Choose appropriate dedicated connectivity or VPN for your workload
Severity	High
Reference	https://aws.amazon.com/
Validation	Dedicated connectivity and VPN connections
Status	No VPN or Direct Connect found

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?
BestPractice	Use load balancing to distribute traffic across multiple resources
Severity	High
Reference	https://aws.amazon.com/
Validation	Load balancers for traffic distribution
Status	No load balancers found

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?

BestPractice	Choose network protocols to improve performance
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Network protocol selection
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?
BestPractice	Choose your workload's location based on network requirements
Severity	Medium
Reference	https://aws.amazon.com/
Validation	CloudFront CDN for workload location optimization
Status	No CloudFront distributions found

WAFPillar	PerformanceEfficiency
Question	How do you select and configure networking resources in your workload?
BestPractice	Optimize network configuration based on metrics
Severity	Low
Reference	https://aws.amazon.com/
Validation	VPC Flow Logs for network metrics
Status	No VPC Flow Logs found

WAFPillar	PerformanceEfficiency
------------------	-----------------------

Question	How do you store, manage, and access data in your workload?
BestPractice	Use purpose-built data store that best support your data access and storage requirements
Severity	High
Reference	https://aws.amazon.com/
Validation	Purpose-built data stores
Status	Data store distribution: DynamoDB: 1

WAFPillar	PerformanceEfficiency
Question	How do you store, manage, and access data in your workload?
BestPractice	Evaluate available configuration options for data store
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Data store configuration options
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you store, manage, and access data in your workload?
BestPractice	Collect and record data store performance metrics
Severity	High
Reference	https://aws.amazon.com/
Validation	Data store performance metrics
Status	RDS ReadLatency/WriteLatency metrics: 0

WAFPillar	PerformanceEfficiency
Question	How do you store, manage, and access data in your workload?
BestPractice	Implement strategies to improve query performance in data store
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Query performance strategies
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you store, manage, and access data in your workload?
BestPractice	Implement data access patterns that utilize caching
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Caching in data access patterns
Status	No ElastiCache clusters found

WAFPillar	PerformanceEfficiency
Question	How do you select and use compute resources in your workload?
BestPractice	Select the best compute options for your workload
Severity	High
Reference	https://aws.amazon.com/
Validation	Best compute options for workload
Status	Instance distribution: No EC2 instances

WAFPillar	PerformanceEfficiency
Question	How do you select and use compute resources in your workload?
BestPractice	Understand the available compute configuration and features
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Compute configuration and features understanding
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select and use compute resources in your workload?
BestPractice	Collect compute-related metrics
Severity	High
Reference	https://aws.amazon.com/
Validation	Compute-related metrics collection
Status	EC2 CPUUtilization metrics: 0, Compute Optimizer recommendations: 0

WAFPillar	PerformanceEfficiency
Question	How do you select and use compute resources in your workload?
BestPractice	Configure and right-size compute resources
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Right-size compute resources

Status	Over-provisioned: 0, Under-provisioned: 0
---------------	---

WAFPillar	PerformanceEfficiency
Question	How do you select and use compute resources in your workload?
BestPractice	Scale your compute resources dynamically
Severity	High
Reference	https://aws.amazon.com/
Validation	Dynamic compute scaling
Status	0 Auto Scaling group(s)

WAFPillar	PerformanceEfficiency
Question	How do you select and use compute resources in your workload?
BestPractice	Use optimized hardware-based compute accelerators
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Hardware-based compute accelerators (GPU)
Status	0 GPU/accelerator instance(s) (p*, g*)

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Learn about and understand available cloud services and features
Severity	High
Reference	https://aws.amazon.com/

Validation	Cloud services and features understanding
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Use guidance from your cloud provider or an appropriate partner to learn about architecture patterns and best
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Architecture patterns and best practices guidance
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Factor cost into architectural decisions
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Cost factor in architectural decisions
Status	0 budget(s) configured

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Evaluate how trade-offs impact customers and architecture efficiency
Severity	High

Reference	https://aws.amazon.com/
Validation	Trade-offs impact on customers and architecture efficiency
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Use policies and reference architectures
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Policies and reference architectures
Status	0 Service Catalog portfolio(s)

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Use benchmarking to drive architectural decisions
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Benchmarking for architectural decisions
Status	Requires manual review

WAFPillar	PerformanceEfficiency
Question	How do you select the appropriate cloud resources and architecture patterns for your workload?
BestPractice	Use a data-driven approach for architectural choices

Severity	Medium
Reference	https://aws.amazon.com/
Validation	Data-driven architectural choices
Status	Requires manual review
