

Workload Assessment Detailed Report

Assessment Name:	DandG-AfterInc-USA
Assessment Description:	To assess all the resources of the 10 AWS accounts
Cloud Account:	 afterinc
Workload Name:	Workload_Master_1
Report Date:	03-Sep-2025
Framework:	 AWS Well-Architected Framework

Table of Contents

Workload Assessment Summary

- Summary by Questions

Workload Assessment Summary

Summary by Questions

Pillar	Total Questions	Verified	High Risk Issues (HRI)	Medium Risk Issues (MRI)	Low Risk Issues (LRI)	Not Applicable
Cost Optimization	11	0	9	1	1	0
Operational Excellence	11	0	10	1	0	0
Performance Efficiency	5	0	5	0	0	0
Reliability	13	0	13	0	0	0
Security	11	0	10	1	0	0
Sustainability	6	0	0	6	0	0
Total (includes all pillars)	57	0	47 (82.46%)	9 (15.79%)	1 (1.75%)	0

Summary by Best Practices

Pillar	Total Best Practices	Verified	High Risk Issues (HRI)	Medium Risk Issues (MRI)	Low Risk Issues (LRI)	Not Applicable
Cost Optimization	50	8	18	13	11	0
Operational Excellence	68	5	25	30	8	0
Performance Efficiency	32	8	11	9	4	0
Reliability	67	6	29	31	1	0
Security	63	10	23	21	9	0
Sustainability	28	3	0	19	6	0
Total (includes all pillars)	308	40 (12.99%)	106 (34.42%)	123 (39.94%)	39 (12.66%)	0

Workload Assessment Details With Resources

Pillar Name	Cost Optimization	Status	Violation
Question	02. How do you govern usage?	No. of Violated Resources	91
Best Practice	01. Develop policies based on your organization requirements	Resource Category	Storage
Severity	High	Resource	Buckets
Policy	AWS Audit S3 Life Cycle Configuration CS Policy	Resource Type	S3
Policy Description	This policy audits whether Amazon S3 buckets have been provisioned with lifecycle configuration enabled. With an S3 lifecycle configuration, you can enable Amazon S3 to downgrade the storage class for your objects, archive or delete S3 objects during their lifecycle. This rule becomes non-compliant if the Amazon s3 buckets have been provisioned without configuring lifecycle rules		
Policy Recommendation	It is recommended to ensure that your Amazon S3 buckets are using lifecycle configurations for security and cost optimization purposes. An S3 lifecycle configuration is a set of one or more rules, where each rule defines an action (transition or expiration action) for Amazon S3 to apply to a group of objects. A lifecycle configuration is used to manage Amazon S3 data during its lifetime.
