

AWS Well Architected Framework Review Report

WAFPillar	Sustainability
Question	How do your organizational processes support your sustainability goals?
BestPractice	Adopt methods that can rapidly introduce sustainability improvements
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Rapid sustainability improvements (CI/CD)
Status	0 CodePipeline(s) for rapid CI/CD changes

WAFPillar	Sustainability
Question	How do your organizational processes support your sustainability goals?
BestPractice	Keep your workload up-to-date
Severity	Low
Reference	https://aws.amazon.com/
Validation	Workload up-to-date (patch status)
Status	0 instance(s) with SSM (patch status)

WAFPillar	Sustainability
Question	How do your organizational processes support your sustainability goals?
BestPractice	Increase utilization of build environments
Severity	Low
Reference	https://aws.amazon.com/

Validation	Build environment utilization
Status	0 CodeBuild project(s)

WAFPillar	Sustainability
Question	How do your organizational processes support your sustainability goals?
BestPractice	Use managed device farms for testing
Severity	Low
Reference	https://aws.amazon.com/
Validation	Managed device farms for testing
Status	Requires manual review

WAFPillar	Sustainability
Question	How do you select and use cloud hardware and services in your architecture to support your sustainability goals?
BestPractice	Use the minimum amount of hardware to meet your needs
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Minimum hardware (over-provisioning)
Status	Over-provisioned instances: 0

WAFPillar	Sustainability
Question	How do you select and use cloud hardware and services in your architecture to support your sustainability goals?
BestPractice	Use instance types with the least impact
Severity	Medium

Reference	https://aws.amazon.com/
Validation	Graviton/low-impact instance types
Status	0 Graviton instance(s) (a1, t4g, m6g, c6g, r6g, m7g, c7g, r7g)

WAFPillar	Sustainability
Question	How do you select and use cloud hardware and services in your architecture to support your sustainability goals?
BestPractice	Use managed services
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Managed services usage
Status	RDS: 0, DynamoDB: 1, Lambda: 4, ECS clusters: 0

WAFPillar	Sustainability
Question	How do you select and use cloud hardware and services in your architecture to support your sustainability goals?
BestPractice	Optimize your use of hardware-based compute accelerators
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Hardware compute accelerators (GPU)
Status	0 GPU/accelerator instance(s) (p*, g*, inf*, trn*)

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Implement a data classification policy

Severity	Medium
Reference	https://aws.amazon.com/
Validation	Data classification policy
Status	Requires manual review

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Use technologies that support data access and storage patterns
Severity	Low
Reference	https://aws.amazon.com/
Validation	Technologies for data access and storage
Status	DynamoDB tables: 1, ElastiCache clusters: 0

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Use policies to manage the lifecycle of your datasets
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Lifecycle policies for datasets
Status	5 S3 bucket(s) with lifecycle policies

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?

BestPractice	Use elasticity and automation to expand block storage or file system
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Elasticity for block storage (gp3)
Status	gp3 volumes: 0, other: 0

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Remove unneeded or redundant data
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Remove unneeded or redundant data
Status	Unattached volumes: 0, S3 buckets with lifecycle expiration: 5

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Use shared file systems or storage to access common data
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Shared file systems
Status	0 EFS file system(s)

WAFPillar	Sustainability
------------------	----------------

Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Minimize data movement across networks
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Minimize data movement (VPC endpoints)
Status	0 VPC endpoint(s) (reduces data movement)

WAFPillar	Sustainability
Question	How do you take advantage of data management policies and patterns to support your sustainability goals?
BestPractice	Back up data only when difficult to recreate
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Back up data only when difficult to recreate
Status	Requires manual review

WAFPillar	Sustainability
Question	How do you take advantage of software and architecture patterns to support your sustainability goals?
BestPractice	Optimize software and architecture for asynchronous and scheduled jobs
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Async and scheduled jobs
Status	SQS queues: 1, EventBridge rules: 2 (async components)

WAFPillar	Sustainability
Question	How do you take advantage of software and architecture patterns to support your sustainability goals?
BestPractice	Remove or refactor workload components with low or no use
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Low/no-use workload components
Status	Compute Optimizer underutilized: 0 instance(s)

WAFPillar	Sustainability
Question	How do you take advantage of software and architecture patterns to support your sustainability goals?
BestPractice	Optimize areas of code that consume the most time or resources
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Code optimization (profiling)
Status	4 Lambda function(s). Profiling requires manual review

WAFPillar	Sustainability
Question	How do you take advantage of software and architecture patterns to support your sustainability goals?
BestPractice	Optimize impact on devices and equipment
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Impact on devices and equipment
Status	Requires manual review

WAFPillar	Sustainability
Question	How do you take advantage of software and architecture patterns to support your sustainability goals?
BestPractice	Use software patterns and architectures that best support data access and storage patterns
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Data access and storage patterns
Status	ElastiCache: 0, DynamoDB tables: 1

WAFPillar	Sustainability
Question	How do you align cloud resources to your demand?
BestPractice	Scale workload infrastructure dynamically
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Dynamic workload scaling
Status	0 Auto Scaling group(s)

WAFPillar	Sustainability
Question	How do you align cloud resources to your demand?
BestPractice	Align SLAs with sustainability goals
Severity	Medium
Reference	https://aws.amazon.com/
Validation	SLAs aligned with sustainability goals

Status	Requires manual review
--------	------------------------

WAFPillar	Sustainability
Question	How do you align cloud resources to your demand?
BestPractice	Stop the creation and maintenance of unused assets
Severity	Low
Reference	https://aws.amazon.com/
Validation	Stop unused assets (waste)
Status	No significant waste detected

WAFPillar	Sustainability
Question	How do you align cloud resources to your demand?
BestPractice	Optimize geographic placement of workloads based on their networking requirements
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Geographic placement optimization
Status	Requires manual review

WAFPillar	Sustainability
Question	How do you align cloud resources to your demand?
BestPractice	Optimize team member resources for activities performed
Severity	Low
Reference	https://aws.amazon.com/

Validation	Team member resource optimization
Status	Requires manual review

WAFPillar	Sustainability
Question	How do you align cloud resources to your demand?
BestPractice	Implement buffering or throttling to flatten the demand curve
Severity	Low
Reference	https://aws.amazon.com/
Validation	Buffering/throttling to flatten demand
Status	1 SQS queue(s)

WAFPillar	Sustainability
Question	How do you select Regions for your workload?
BestPractice	Choose Region based on both business requirements and sustainability goals
Severity	Medium
Reference	https://aws.amazon.com/
Validation	Region selection for sustainability
Status	Account: 595588732539, Region: us-east-1, AZs: 6. Note: Choose renewable-energy regions (e.g. us-west-2, eu-north-1) where possible.
